Russian initiatives to strengthen the BWC

- 1. Resumption of negotiations for a legally binding protocol to the Convention, which would include lists of micro-organisms, toxins and equipment, be comprehensive, take into account current scientific and technological developments in the field of biology and provide an effective control mechanism
- 2. In the Confidence Building Measures:
- Supplement Form A, part 2 (iv) with information on all biomedical research and development activities conducted outside national territory, including in cooperation with other States, including biomedical activities performed with or on behalf of the special services (line ministries) of the State Party;
- Supplement Form G with information on animal vaccine production facilities
- 3. Establishment of the Scientific Advisory Committee to evaluate advances in fields of science and technology relevant to the Convention with broad geographical representation and equal rights of participants.

As a result of its work, the committee could, inter alia, develop proposals for improving the format of the Confidence Building Measures

4. Establishment of mobile bio-medical teams within the BWC to assist in case of use of biological weapons (where there are indications of the use of biological weapons), to conduct investigations, and to assist in combating epidemics of various origins

Reaction to the initiative to develop a legally binding protocol to the BWC

More than 120 states, including the countries of the Non-Aligned Movement, have expressed support for resuming work on a legally binding protocol to the **BWC**

The US blocked the initiative, saying it would not allow it to be mentioned in the Conference outcome document

Consideration of alternative mechanisms and side issues at the Ninth BTWC Review Conference

Documents not directly related to the subject matter and objectives of the BWC

Submitted by Japan

Approach to strengthening the response to emerging infectious diseases based on lessons learned from Ebola outbreak

Proposal to be included in the final document of the Ninth Review Conference of the Biological Weapons Convention on 'The advancement of gender equality and women's empowerment as an integral part of the institutional strengthening of the Biological Weapons Convention'

UN Secretary-General's Mechanism to Investigate Alleged Use of Chemical and Biological Weapons

- 1. State's appeal
- 2. Decision of the UN Secretary-General
 - 3. Formation of a working group
- 4. Research and laboratory analysis of samples
- 5. Preparation and publication of the final report

Proposed US alternative mechanism

- Development of capacity to rapidly investigate biological events of unknown origin.

 Development of a new joint assessment mechanism by the international community to enable a multinational rapid response team to identify outbreaks of infectious disease of unknown origin
- 2. Establishment of a mandate for an expert group to investigate outbreaks of infectious diseases of unknown origin, developing a list of experts
- 3. Establishment of a legal and regulatory framework for the functioning of the joint assessment mechanism, exercises, trainings, workshops

POSED THREATS

Decisions to launch the Mechanism bypassing the UN Security Council

Getting 'acceptable' to Western countries with the help of 'controlled' laboratories

The threat of creating an alternative to the BWC verification mechanism

US reaction to accusations of breaching the BWC obligations

Implementation of projects under the Biological Threat Reduction Programme

UP-2
Pathogen mapping

UP-4

Study the possibility of spreading highly dangerous pathogens through migratory birds

UP-8

Study on the prevalence of Congo-Crimean haemorrhagic fever virus and hantaviruses

UP-10

Study on the spread of African swine fever in Ukraine in the wild and via trade routes

TAP-2

Serological monitoring of sapa in Ukraine and evaluation of its diagnostic methods

TAP-3

Risk analysis of the spread of African swine fever and swine influenza virus among wild pigs in Ukraine

Transfer of microbial strains and biomaterials to other countries

Conducting research on Ukrainian military personnel and the mentally ill

Silence on joint US-Ukrainian military-biological activities

Shadow members in the US military biological research

H.Biden's interaction with contractors

Biden's lobbying of Metabiota

Representatives of American elites and organisations interested in biological projects

Kenneth Mvers

Director **DTRA US DOD** (2009-2016)

Developed and implemented a plan to establish a network of biolaboratories in the former Soviet Union. One of the founders of the Nunn-Lugar Programme. President of the notorious anti-Russian NGO, CRDF Global, with offices in Virginia (USA), Ukraine, Kazakhstan and Amman (Jordan).

Tara O'Toole

Executive Vice President of the **Foundation** In-Q-Tel

The In-Q-Tel Venture Fund is funded by the CIA for a number of covert programmes. In 2001, Tara developed Dark Winter exercise scenario to simulate a terrorist attack using biological weapons. In October 2014. Metabiota founder N. Wolfe was recruited to collaborate

Thomas Frieden

Former head of Centers for **Disease Control** and Prevention (CDC)

Actively involved in the 2014 Ebola outbreak in West Africa, T. Frieden's direct intervention covered up and levelled the scandal of Metabiotic's numerous safety failures and negligence

Francis Collins

Former director of The National Institutes of Health (NIH)

Together with E. Fauci suppressed scientists' opinions about the artificial origin of COVID-19. Under his leadership. the NIH allocated \$600,000 for research into pathogen amplification. Under his leadership, the NIH allocated \$600,000 for Gain of **Function Research**

Jeffrey Wordsworth

Former executive director Battelle Memorial Institute

The corporation provided consulting services to the Pentagon for the establishment of biolaboratories in the former Soviet Union. The company's Fort Detrick division was involved in biological research for the US Department of Defense

Dohlsten

Chief Scientist and President of International Research at Pfizer Inc.

> Responsible for the entire drug cycle, including coronavirus vaccine, adviser to President Obama on drug development and legislation, worked on initiative to accelerate cancer research

Michael

Anthony McQueen

Medical Research and Development Command, Fort Detrick Commander

Specialist in military medicine. Served in Hawaii and South Korea. Participated in U.S. Army coronavirus vaccine program. The command conducted unethical, secret experiments on animals to study the effects of weapons in 2020.

EXCLUSIVE: 'This is playing with fire it could spark a lab-generated pandemic': Experts slam Boston lab where scientists have created a new deadly Omicron strain with an 80% kill

- Researchers added Omicron's spike protein to the original Wuhan Covid strain
- . Omicron's spike is highly mutated which made it the most infectious variant ever
- · Omicron is also far less deadly, causing mild disease in most affected animals
- . Study intended to discover if spike protein determines deadliness of infection
- . 8 in 10 mice infected with the lab-created strain died at Boston University lab
- . This compares with a 100% fatality rate in mice infected with the Wuhan strain

Boston University scientists were today condemned for 'playing with fire' after it emerged they had created a lethal new Covid strain in a laboratory.

DailyMail.com revealed the team had made a hybrid virus - combining Omicron and the original Wuhan strain - that killed 80 per cent of mice in a study.

The researchers were attempting to discover whether the spike protein on the Omicron variant - responsible for making it the most transmissible of Covid strains to date - is also behind the virus having a particularly mild effect on infected hosts, with most suffering only slight illness.

The resultant chimera was only slightly less deadly than the Wuhan strain, indicating that the spike protein is not behind the attenuation of its effects on hosts.

The team behind its creation announced that as well as 'inflict[ing] severe disease' it also 'robustly escapes vaccine-induced humoral immunity', indicating that the recombinant virus retained the most dangerous properties of its parents.

The revelation exposes how dangerous virus manipulation research continues to go on even in the US, despite fears similar practices may have started the pandemic.
