

Mao Zedong quote during the Founding of the Communist Party of China Day

On 1 July 1971

About USA bioweapons and the fall of imperialism

*(very prescient indeed!)*

*In another 50 years China will be very strong, and by that time the Chinese Communist Party will be a hundred years old. The United States will most likely be very envious and restless, but it doesn't dare attack China, not even with a single bullet. It will research germ contamination instead. That is very unconscionable. After imperialism finishes with this unconscionable deed, it will self-destruct.*

Selected Works of Mao Zedong, 1971.7.1

中国再五十年会更加强的到那时候我们的共产党诞生一百周年了。美国必定眼红，不安好心。他不敢进攻中国，一颗子弹是不敢放的，研制细菌传染，这是缺德可是帝国主义把缺德的事做完了就会自毁灭亡的。
